About me

I am a student of programming, with a keen interest in the field of frontend development. Although my college curriculum covers various areas of study, my passion and creative nature have led me towards frontend development. I love to see the results of my work immediately, and I firmly believe that a high-quality and efficient user interface is a key factor in the success of a web application. I am constantly improving my skills and keeping up with the latest trends in frontend development, to create more quality and attractive interfaces for users.

Skills

HTML, CSS, SASS, JavaScript, React, Bootstrap, Figma.

Basic knowledge: Python, Java, SQL.

Languages: Finnish-intermediate, English-intermediate, Russian-native.

Academic Projects

[Freelance Portfolio Website](#)

Portfolio website for front-end developer implemented using HTML5, CSS3 and JavaScript.

A special feature of this project is the integration of the automatic theme switching function depending on the user's settings on his computer.

[Landing_page for a company](#)

Landing website built using HTML5, CSS3 and SASS. Design based on an open source layout in the Figma community. JavaScript and jQuery provide interoperability and additional functionality. The site is adapted for mobile devices.

[Workout App](#)

Workout App developed with React, Axios, React Query and SCSS. With React, the application provides a dynamic and responsive user experience, and Axios is used to make HTTP requests to the server. React Query provides state management and data caching, which improves application performance.

Education

Pohjois-Karjalan koulutuskuntayhtymä Riveria

Tieto- ja viestintätekniikan perustutkinto

April 2022- Present
